

# Third International School-Seminar on Early Aid to Children and Their Families

St. Petersburg, May 27 – 31, 2019

*Information Letter*

Dear colleagues!

We invite you to participate in the third international school–seminar on early aid to children and their families aimed to discuss the experience of advanced national and international practices of organization of the early aid system, training of professionals – researchers and practitioners in the field of physiology, medicine, education, social work, psychology; development of evidence based and scientifically proved programs of early aid to children and their families.

School–seminar will be run in a format of lectures, presentations, round tables, online presentations, master classes and discussions. Specialists will present their experience of disseminating technologies of early aid in different regions of Russia and other countries; leading experts will share different aspects of modern approaches to providing early aid services to children and their families.

Specialists from Norway, European Union countries, India, Belarus, Kyrgyzstan and other countries will take part in the work of school-seminar.

Following topics will be discussed:

- using results of basic research in physiology in early aid practice;
- evaluating of the effectiveness of early aid programs for children: different approaches;
- creating “team around the child’ and how it works;
- interdepartmental interaction in the process of early aid services;
- historical aspects of development of early aid programs;
- training of specialists.

Activities of school – seminar will take place in different places:

- ✓ **May 27** – Pavlov Institute of Physiology Russian Academy Sciences (St. Petersburg, Makarova emb., 6) – opening of the school-seminar in the frame of the international conference “Audio and visual signals processing in the context of neurotechnology” (SPCN-2019)
